Previous Experience

Mr. Jackson has 25 years experience in Educational Administration. He has worked in various states including Texas, California, and Florida.

Relevant Experience

For the past five years Mr. Jackson has managed projects involving building envelope, moisture intrusion, and HVAC investigations. During that time Mr. Jackson has managed and investigated moisture and storm-related problems on various projects. Additionally, Mr. Jackson has worked on schools, dormitories, apartment complexes, condominium units, and a variety of commercial facilities. These projects include the following:

- **Project Manager** - Building Envelope Investigation of a 24-building apartment complex in Orlando, Florida. Investigated water intrusion related moisture problems. Assisted the client in recovering \$6.23 million in repair costs.
- **Project Manager** - Building Envelope and HVAC Investigation of a 700+ student public Middle School in south Florida. Conducted building envelope and HVAC system evaluation to determine the potential of moisture related problems.
- **Project Manager** - Building Envelope Investigation of a multi-unit apartment complex in central Florida. Provided forensic analysis of the building envelope. Evaluated proper use of materials and barriers.
- **Project Manager** - Building Envelope Investigation of a multi-unit upscale condominium complex in Miami, Florida. Investigative services provided client with issues relative to moisture problems.
- **Project Manager** - Forensic analysis of classrooms for a public school in southwest Florida. Assisted the client in settlement meetings in recovery of repair costs.
- **Project Manager** - Building Envelope Investigation of a government complex in Jacksonville, Florida.
- **Field Investigator** - Investigated moisture-related problems in a major hotel development in Hong Kong.

- **Field Investigator** - Investigated storm-related moisture problems at a 350+ room resort facility at the Disney Resort Vero Beach, Florida. Investigation required fast track moisture control measures and assessment in order to keep the facility operational.
- **Field Investigator** - Investigated moisture-related problems to evaluate the proper use of materials and barriers in a multi-unit apartment complex in Orlando, Florida.
- **Field Investigator** - Investigated moisture-related problems in a multi-unit apartment complex in Tampa, Florida.
